Understanding the regulatory environment is critical to the successful development, manufacturing, labeling, marketing, and delivery of nutrition-related products to the consumer. Knowing how to manage risk while navigating the regulatory path to market is essential. Students in this course will become familiar with: the process for developing new nutrition products; the regulations applicable to foods, medical foods, dietary supplements and ingredients; and how to represent scientific evidence accurately and appropriately when substantiating label claims and advertisements.

3 credits
5-week during Summer Session 1 (June 1-July 2)
Instructor: Dr. Susan Mitmesser (susan.mitmesser@uconn.edu)
Prerequisite: NUSC 1165 or instructor’s consent
